JavaScript Certification  
Build a Planets Tablist  
Instructions  index.html  styles.css  script.js  
Step 21  
For the last step, you need to make the panel visible when its associated tab is clicked. You can do this by setting the hidden property of the panel to false.  
Click on any of the tabs, and you should see the corresponding panel content displayed.  
And with that last change, your workshop is complete!  
script.js  
1 const tabs = document.querySelectorAll('[role="tab"]');  
2 const panels = document.querySelectorAll('[role="tabpanel"]');  
3  
4 tabs.forEach(tab => {  
5   tab.addEventListener("click", () => {  
6     tabs.forEach(t => t.setAttribute("aria-selected", "false"));  
7     panels.forEach(p => p.hidden = true);  
8     tab.setAttribute("aria-selected", "true");  
9     const associatedPanel = tab.getAttribute("aria-controls");  
10    const panel = document.getElementById(associatedPanel);  
11  
12    // Your code here  
13  });
