WEEKLY ACCOMPLISHMENT REPORT
Week 2-July-2026

Name of Intern : Briones, Ritchelene E.
Position : Full-Stack Web Dev Trainee
Office : Kairos Coffee 2nd Floor

Date / Day		Actual Time Log	Actual Accomplishment
June 29, 2026	Monday	MORNING IN: 8:00 AM OUT: 12:05 PM AFTERNOON IN: 12:51 PM OUT: 5:00 PM	Started the week by learning what CSS is and its overall role on the web. Studied the basic anatomy of a CSS rule, the purpose of the meta viewport element, and how default browser styles apply to HTML. Also covered the main differences between inline, internal, and external CSS to understand when to use each approach, followed by looking into how element width and height work.
June 30, 2026	Tuesday	MORNING IN: 8:00 AM OUT: 12:05 PM AFTERNOON IN: 12:51 PM OUT: 5:00 PM	Focused on layout structure and spacing concepts today. Learned about the different types of CSS combinators and the core differences between inline and block-level elements. Studied how inline-block works compared to regular inline or block elements, and went through how margins and padding function. Put these styling basics into practice by designing a Café Menu layout.
July 01, 2026	Wednesday	MORNING IN: 8:00 AM OUT: 12:05 PM AFTERNOON IN: 12:51 PM OUT: 5:00 PM	Practiced practical layout implementation further by designing a professional Business Card project. Afterward, shifted focus toward CSS logical rules, specifically diving into CSS Specificity. Studied how specificity changes between inline, internal, and external styles, and looked at how the universal selector and basic type selectors carry different weights.
July 02, 2026	Thursday	MORNING IN: 8:00 AM OUT: 12:05 PM AFTERNOON IN: 12:51 PM OUT: 5:00 PM	Continued breaking down selector hierarchy by studying the specificity rules for class selectors and ID selectors. Covered how the <code>!important</code> keyword works to override styles, along with the proper use cases and best practices for it. Spent time mapping out selector weights to better understand how conflicting styles resolve.

July 03, 2026	Friday	MORNING IN: 9:00 AM OUT: 12:05 PM AFTERNOON IN: 12:51 PM OUT: 5:00 PM	Reported on-site to present the personal profile portfolio built using HTML and CSS. Used Git Bash to commit and push the project files directly to GitHub, and spent the remainder of the day continuing with the regular freeCodeCamp training modules.
July 04, 2026	Saturday	MORNING IN: 9:00 AM OUT: 12:05 PM AFTERNOON IN: 12:51 PM OUT: 5:00 PM	Wrapped up the foundational modules by studying how the cascade algorithm and style inheritance work at a high level. Spent the remaining time completing a comprehensive CSS Fundamentals Review to lock in everything learned throughout the week, and successfully closed out the block by passing the CSS Fundamentals Quiz.
Total Time Completed: 47 hours

Step 89

It would be nice if the vertical space between the `h2` elements and their associated icons was smaller. The `h2` elements have default top and bottom margin space, so you could change the bottom margin of the `h2` elements to say `0` or another number.

There is an easier way, simply add a negative top margin to the `img` elements to pull them up from their current positions. Negative values are created using a `-` in front of the value. To complete this workshop, go ahead and use a negative top margin of `25px` in the `img` type selector.

Congratulations! You have completed the Cafe Menu workshop.

Build a Stylized To-Do List

Build an app that is functionally similar to this example project. Try not to copy the example project, give it your own personal style.

In this lab, you will practice the different styles that can be applied to links when they are hovered over, focused, clicked, and visited.

Objective: Fulfill the user stories below and get all the tests to pass to complete the lab.

User Stories:

- You should have one unordered list with the class `todo-list`.
- Inside the unordered list, you should have four list items.
- Inside each list item, there should be:
 - An `input` element with the type `checkbox` and `id` set to a unique value.
 - A `label` element with the `for` attribute set to the corresponding `input` element's `id`.
 - An unordered list with the class `sub-item`.
 - A list item with an anchor element in it. The anchor should have the class `sub-item-link`, a valid `href` value, and a `target` value that makes the link open in a new tab.
- Your `a` elements should not have any text.

that there is padding inside the card.

8. The `.post-title` and `.post-excerpt` elements should have a text color other than the default and margins on all sides.

9. The `.read-more` element should be styled like a button and have:

- A text color other than the default.
- A background color.
- Margins on all sides.
- Rounded corners.
- A `display` property set to `inline-block`.
- A hover effect that changes its background color.

Note: Be sure to link your stylesheet in your HTML and apply your CSS.

Tests:

1. You should have a `div` with a class of `blog-post-card`.

2. You should have an `img` element with a `class` of `post-img`. Make sure your image has an `alt` attribute with text and a `src` attribute with a value.

3. You should have a `div` with class of `post-content`.

4. You should have an `h2` element with a class of

Build an Event Flyer Page

Build an app that is functionally similar to this example project. Try not to copy the example project, give it your own personal style.

Objective: Fulfill the user stories below and get all the tests to pass to complete the lab.

User Stories:

1. You should have a `header` element within the body.

2. Your `header` element should have an image in it for your event, and an `h1` in it with your event title, in that order. You can use this image if you would like: <https://cdn.freecodecamp.org/curriculum/labs/event.jpg>

3. You should have a `main` element within the body.

4. Your `main` element should have at least two `section` elements within it showcasing the event features.

5. Your `section` elements each should have an `h2` within them.

6. Your body should have a top and bottom padding of `50px`.

7. Your body should have a top and bottom margin of `0`, and a left and right margin that centers itself.

8. Your body should have a width set relative to the width of the viewport.

9. Your body should use the `calc` function to set its `min-height` property to 100% of the viewport's
