WEEKLY ACCOMPLISHMENT REPORT
Week 7-August-2026

Name of Intern : Briones, Ritchelene E.
Position : Full-Stack Web Dev Trainee
Office : Kairos Coffee 2nd Floor

Date / Day		Actual Time Log	Actual Accomplishment
August 03, 2026	Monday	MORNING IN: 8:00 AM OUT: 12:05 PM AFTERNOON IN: 12:51 PM OUT: 5:00 PM	Set up Docker Desktop and launched a local MySQL container via Docker Compose. Used the MySQL CLI to run introductory SQL commands, create test tables, and practice basic data insertion.
August 04, 2026	Tuesday	MORNING IN: 8:00 AM OUT: 12:05 PM AFTERNOON IN: 12:51 PM OUT: 5:00 PM	Connected a front-end CRUD project to the containerized MySQL database server. Reviewed the connection code line-by-line to understand client-to-database data flow and researched connection setup best practices.
August 05, 2026	Wednesday	MORNING IN: 8:00 AM OUT: 12:05 PM AFTERNOON IN: 12:51 PM OUT: 5:00 PM	Kicked off the MySQL Store Database (<code>ojt_store</code>) task by creating relational tables for customers, products, orders, and order items. Configured primary/foreign keys, constraints, and populated initial test datasets.
August 06, 2026	Thursday	MORNING IN: 8:00 AM OUT: 12:05 PM AFTERNOON IN: 12:51 PM	Executed CRUD operations, price/stock updates, and multi-table queries. Practiced using <code>INNER JOIN</code> and <code>LEFT JOIN</code> to link customer orders, alongside <code>GROUP BY</code> and aggregate functions (<code>SUM</code> , <code>COUNT</code> , <code>AVG</code>) to analyze sales data.

Republic of the Philippines
North Eastern Mindanao State University

		OUT: 5:00 PM	
August 07, 2026	Friday	MORNING IN: 8:00 AM OUT: 12:05 PM AFTERNOON IN: 12:51 PM OUT: 5:00 PM	Solved 10 independent SQL queries focused on business insights like top-spending customers and best-selling items. Documented relational concepts in a README.md, captured result screenshots, and submitted the complete batch1_mysql_activity.sql script.
August 08, 2026	Saturday	MORNING IN: 8:00 AM OUT: 12:05 PM AFTERNOON IN: 12:51 PM OUT: 5:00 PM	Started backend development using Node.js, NVM, and Express. Built a server health endpoint and constructed an in-memory Task CRUD API to practice routing, status codes, and input validation before database integration.
Total Time Completed: 47h Remaining Hours: 8h 42m (out of 324 hrs)

Design a Cafe Menu

Instructionsindexhtmlstyles.css

ConsolePreview

Step 89

It would be nice if the vertical space between the `h2` elements and their associated icons was smaller. The `h2` elements have default top and bottom margin space, so you could change the bottom margin of the `h2` elements to say `0` or another number.

There is an easier way, simply add a negative top margin to the `img` elements to pull them up from their current positions. Negative values are created using a `-` in front of the value. To complete this workshop, go ahead and use a negative top margin of `25px` in the `img` type selector.

Congratulations! You have completed the Cafe Menu workshop.

styles.css

```
21 h1, h2, p {
22 }
23
24
25 .menu {
26   width: 80%;
27   background-color: #burlywood;
28   margin-left: auto;
29   margin-right: auto;
30   padding: 20px;
31   max-width: 500px;
32 }
33
34 img {
35   display: block;
36   margin-left: auto;
37   margin-right: auto;
38 }
39
40
41 hr {
42   height: 2px;
43   background-color: #brown;
44   border-color: #brown;
45 }
46
47 .bottom-line {
48   margin-top: 25px;
49 }
50
51 h1, h2 {
52   font-family: Impact, serif;
53 }
```

Build a Stylized To-Do List

Instructionsindexhtmlstyles.css

ConsolePreview

Build a Stylized To-Do list

Build an app that is functionally similar to this example project. Try not to copy the example project, give it your own personal style.

In this lab, you will practice the different styles that can be applied to links when they are hovered over, focused, clicked, and visited.

Objective: Fulfill the user stories below and get all the tests to pass to complete the lab.

User Stories:

1. You should have one unordered list with the class `todo-list`.

2. Inside the unordered list, you should have four list items.

3. Inside each list item, there should be:

- An `input` element with the type `checkbox` and `id` set to a unique value.
- A `label` element with the `for` attribute set to the corresponding `input` element's `id`.
- An unordered list with the class `sub-item`.
- A list item with an anchor element in it. The anchor should have the class `sub-item-link`, a valid `href` value, and a `target` value that makes the link open in a new tab.

4. Your `a` elements should not have any text

index.html

```
34 <ul class="todo-list">
35   <li>
36     <div class="sub-item">
37       <div>
38         <input type="checkbox" id="task1" />
39         <div>
40           <div class="sub-item-link"
41             href="https://css-tricks.com/"
42             target="_blank">
43             CSS Tricks
44           </div>
45         </div>
46       </div>
47     </li>
48   </ul>
49
50   <li>
51     <input type="checkbox" id="task2" />
52     <div class="sub-item">
53       <div>
54         <input type="checkbox" id="task3" />
55         <div>
56           <div class="sub-item-link"
57             href="https://www.freecodecamp.org/"
58             target="_blank">
59             freeCodeCamp
60           </div>
61         </div>
62       </div>
63     </li>
64   </ul>
65 </div>
```

Design a Blog Post Card

Instructionsindex.htmlstyles.css

ConsolePreview

that there is padding inside the card.

8. The `.post-title` and `.post-excerpt` elements should have a text color other than the default and margins on all sides.

9. The `.read-more` element should be styled like a button and have:

- A text color other than the default.
- A background color.
- Margins on all sides.
- Padding on all sides.
- Rounded corners.
- A `display` property set to `inline-block`.
- A hover effect that changes its background color.

Note: Be sure to link your stylesheet in your HTML and apply your CSS.

Tests:

1. You should have a `div` with a class of `blog-post-card`.
2. You should have an `img` element with a `class` of `post-img`. Make sure your image has an `alt` attribute with text and a `src` attribute with a value.
3. You should have a `div` with class of `post-content`.
4. You should have an `h2` element with a class of

index.html

```
12 <img
13   alt="A scenic landscape with
14   mountains and a lake"
15 >
16
17 <div class="post-content">
18   <h2 class="post-title">Discover
19   the Beauty of Nature</h2>
20
21   <p class="post-excerpt">
22     Explore breathtaking
23     landscapes, peaceful forests,
24     and stunning
25     mountain views while learning
26     how spending time outdoors
27     can improve
28     your well-being.
29   </p>
30   <a class="read-more"
31     href="#">Read More</a>
32 </div>
33 </body>
34 </html>
```

styles.css

```
35 .post-title {
36   color: #2c3e50;
37   margin: 15px;
38 }
39
40
41 .post-excerpt {
42   color: #555;
43   margin: 15px;
44   line-height: 1.6;
45 }
46
47
48 .read-more {
49   display: inline-block;
50   text-decoration: none;
51   color: white;
52   background-color: #4caf50;
53   padding: 10px 20px;
54   margin: 15px;
55   border-radius: 8px;
56   transition: background-color 0.3s
57     ease;
58 }
59
60 .read-more:hover {
61   background-color: #388e3c;
62 }

Build an Event Flyer Page

Instructionsindex.htmlstyles.css

ConsolePreview

Build an Event Flyer Page

Build an app that is functionally similar to this [example project](#). Try not to copy the example project, give it your own personal style.

Objective: Fulfill the user stories below and get all the tests to pass to complete the lab.

User Stories:

1. You should have a `header` element within the body.
2. Your `header` element should have an image in it for your event, and an `h1` in it with your event title, in that order. You can use this image if you would like: <https://cdn.freecodecamp.org/curriculum/labs/event.jpg>
3. You should have a `main` element within the body.
4. Your `main` element should have at least two `section` elements within it showcasing the event features.
5. Your `section` elements each should have an `h2` within them.
6. Your body should have a top and bottom padding of `50px`.
7. Your body should have a top and bottom margin of `0`, and a left and right margin that centers itself.
8. Your body should have a width set relative to the width of the viewport.
9. Your body should use the `calc` function to set its `min-height` property to 100% of the viewport's

index.html

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">

styles.css

Step 27

As last thing to complete this project, add a `display` property set to `none` to the `section` selector.

After that, create a `section:target` selector, and add there a `display` property set to `block`, so that the `section` elements are visible only when the links are clicked.

styles.css

```
60 .card-links a:focus {
61 }
62
63
64 .card-links a:visited {
65   color: crimson;
66 }
67
68
69 section {
70   margin: 20px auto;
71   max-width: 600px;
72   background-color: whitesmoke;
73   padding: 20px;
74   border-radius: 10px;
75 }
76
77 section:target {
78   transform: skewX(10deg);
79 }
80
```
